Ananya Rao

Bengaluru, India | ananya.rao.sample@example.com | github.com/ananya-sample

Summary

Final-year Computer Science student who enjoys building backend services and small ML projects.

Education

B.E. Computer Science and Engineering | Sample Institute of Technology, Bengaluru | 2023 - 2027 | CGPA: 8.4/10
Class XII (PCMC) | Sample PU College, Bengaluru | 2023 | 91%

Technical Skills

Languages: Python, Java, C, SQL
Frameworks: FastAPI, Flask, scikit-learn, Pandas, NumPy
Tools: MySQL, Git, Linux, Postman, HTML, CSS, JavaScript

Projects

Smart Notes API | FastAPI, MySQL, JWT

- Built a REST API for a note-taking app with user signup, login using JWT and role-based access.
- Designed a normalised MySQL schema with 6 tables and wrote SQL joins for search and tagging.
- Wrote 25 pytest unit tests and documented every endpoint with OpenAPI.

Loan Default Predictor | Python, Pandas, scikit-learn

- Cleaned a 30,000-row public dataset with Pandas and did exploratory data analysis with Matplotlib.
- Trained logistic regression and random forest models; compared them using precision, recall and ROC-AUC.

Campus Events Portal | Flask, HTML, CSS, JavaScript

- Made a small web portal where clubs post events and students register; used Flask templates and SQLite.
- Worked in a team of 3 and handled the backend and deployment on a college Linux server.

Certifications

- Python for Everybody (Coursera), 2024
- SQL (Basic) certificate, HackerRank, 2025

Achievements

- Solved 150+ problems on HackerRank and LeetCode (arrays, strings, hashing).
- Coding club coordinator: led weekly practice sessions for 40 juniors.

SAMPLE RESUME: synthetic data created for testing CareerPilot AI. Not a real person.
